QuickSpecs

Overview

HPE OfficeConnect 1920 Switch Series

Models

HPE OfficeConnect 1920 8G Switch	JG920A
HPE OfficeConnect 1920 8G PoE+ (65W) Switch	JG921A
HPE OfficeConnect 1920 8G PoE+ (180W) Switch	JG922A
HPE OfficeConnect 1920 16G Switch	JG923A
HPE OfficeConnect 1920 24G Switch	JG924A
HPE OfficeConnect 1920 24G PoE+ (180W) Switch	JG925A
HPE OfficeConnect 1920 24G PoE+ (370W) Switch	JG926A
HPE OfficeConnect 1920 48G Switch	JG927A
HPE OfficeConnect 1920 48G PoE+ (370W) Switch	JG928A

Key features

- Customized operation using intuitive Web interface
- Layer 3 static routing with 32 routes for network segmentation and expansion
- Access control lists for granular security control
- Spanning Tree Protocol: STP, RSTP, and MSTP
- Limited Lifetime warranty

Product overview

The HPE OfficeConnect 1920 Switch Series consists of advanced smart-managed fixed-configuration Gigabit switches designed for small businesses in an easy-to-administer solution. By utilizing the latest design in silicon technology, this series is one of the most power efficient in the market.

The series has 9 switches: four non-PoE models and five PoE+ models. All models are equipped with additional Gigabit SFP ports for fiber connectivity. The 8-, 24- and 48-port PoE+ models are available with PoE or without PoE.

The series is part of the OfficeConnect portfolio of Hewlett Packard Enterprise small business networking products. These switches provide a great value, and includes features to satisfy even the most advanced small business networks. All models support rack mounting or desktop operation. Customizable features include basic Layer 2 features like VLANs and link aggregation, as well as advanced features such as Layer 3 static routing, IPv6, ACLs, and Spanning Tree Protocols. HPE OfficeConnect 1920 Switch Series includes a Limited Lifetime Warranty. This warranty provides advance hardware replacement with next business day shipment in most countries, limited 24x7 telephone support available from HPE for the first 90 days, and limited electronic and business hours telephone support is available from HPE for the entire warranty period.

Features and benefits

Management

Simple Web management

allows for easy management of the switch—even by nontechnical users—through an intuitive Web GUI; supports HTTP and HTTP Secure (HTTPS)

• Single IP management

enables management of up to 32 HPE OfficeConnect 1920 switches using a single Web interface; simplifies management of multiple devices

• SNMPv1, v2c, and v3

facilitates management of the switch, as the device can be discovered and monitored from an SNMP management station

• Management Security

restricts access to critical configuration commands; offers multiple privilege levels with password protection; ACLs provide Telnet and SNMP access; local and remote syslog capabilities allow logging of all access

Complete session logging

provides detailed information for problem identification and resolution

Port mirroring

enables traffic on a port to be simultaneously sent to a network analyzer for monitoring

Dual flash images

provides independent primary and secondary operating system files for backup while upgrading

Network Time Protocol (NTP)

synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time

Limited CLI

enables users to quickly deploy and troubleshoot devices in the network

Default DHCP client mode

allows the switch to be directly connected to a network, enabling plug-and-play operation; in absence of a DHCP server on the network, the switch will fall back to a unique static address determined by the switch's MAC address

• FTP, TFTP, and SFTP support

offers different mechanisms for configuration updates; FTP allows bidirectional transfers over a TCP/IP network; trivial FTP (TFTP) is a simpler method using User Datagram Protocol (UDP); Secure File Transfer Protocol (SFTP) runs over an SSH tunnel to provide additional security

Remote monitoring (RMON)

uses standard SNMP to monitor essential network functions; supports events, alarm, history, and statistics group plus a private alarm extension group

Quality of Service (QoS)

• Traffic prioritization

provides time-sensitive packets (like VoIP and video) with priority over other traffic based on DSCP or IEEE 802.1p classification; packets are mapped to eight hardware queues for more effective throughput

• IEEE 802.1p/Q

delivers data to devices based on the priority and type of traffic; supports IEEE 802.1Q

• Class of Service (CoS)

sets the IEEE 802.1p priority tag based on IP address, IP Type of Service (ToS), Layer 3 protocol, TCP/UDP port number, source port, and DiffServ

Broadcast control

allows limitation of broadcast traffic rate to cut down on unwanted network broadcast traffic

Advanced Classifier based QoS

classifies traffic using multiple match criteria based on Layer 2, 3, and 4 information; applies QoS policies such as setting priority level and rate limit to selected traffic on a per-port basis

Rate limiting

sets per-port ingress enforced maximums and per-port, per-queue minimums

Powerful QoS feature

supports the following congestion actions: strict priority queuing (SP), weighted round robin (WRR) queuing, and SP+WRR

Connectivity

IPv6

IPv6 host

enables switches to be managed and deployed at the IPv6 network's edge

o IPv6 routing

supports IPv6 static routes

o MLD snooping

forwards IPv6 multicast traffic to the appropriate interface, preventing traffic flooding

IPv6 ACL/QoS

supports ACL and QoS for IPv6 network traffic

IEEE 802.3X flow control

provides a flow throttling mechanism propagated through the network to prevent packet loss at a congested node

• IEEE 802.3at Power over Ethernet (PoE+)

provides upto 30W per port, which allows support of the latest PoE+-capable devices such as IP phones, wireless access points, and security cameras, as well as any IEEE 802.3af-compliant end device; lowers the cost of additional electrical cabling and circuits that would otherwise be necessary in IP phone and WLAN deployments.

• Cable diagnostics

detects cable issues remotely using a browser-based tool

Flow control

provides back pressure using standard IEEE 802.3x, reducing congestion in heavy traffic situations

Auto MDI/MDI-X

adjusts automatically for straight-through or crossover cables on all 10/100/1000 ports

Security

Advanced access control lists (ACLs)

enables network traffic filtering and enhances network control using MAC- and IP-based ACLs; time-based ACLs allow for greater flexibility with managing network access

• IEEE 802.1X and RADIUS network logins

controls port-based access for authentication and accountability

• Secure Socket Layer (SSL)

encrypts all HTTP traffic, allowing safe access to the browser-based management GUI in the switch

Port Isolation

The port isolation feature isolates Layer 2 traffic for data privacy and security without using VLANs. This feature can also be used to isolate the hosts in a VLAN from one another.

Port Security

Combines and extends IEEE 802.1X and MAC authentication to provide MAC-based network access control

• ARP attack protection

The ARP detection feature enables access devices to block ARP packets from unauthorized clients to prevent user spoofing and gateway spoofing attacks.

Automatic VLAN assignment

assigns users automatically to the appropriate VLAN based on their identity, location and time of day

• STP BPDU port protection

blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks

• STP root guard

protects the root bridge from malicious attacks or configuration mistakes

Automatic denial-of-service protection

monitors for malicious attacks and protects the network by blocking the attacks

Management password

provides security so that only authorized access to the Web browser interface is allowed

Performance

Half- and full-duplex auto-negotiating capability on every port

doubles the throughput on every port

• Selectable queue configurations

allows for increased performance by selecting the number of queues and associated memory buffering that best meet the requirements of the network applications

IGMP snooping

improves network performance through multicast filtering, instead of flooding traffic to all ports

Fiber uplink

provides greater distance connectivity using Gigabit Ethernet fiber uplinks

Layer 2 switching

• Spanning Tree Protocol (STP)

supports standard IEEE 802.1D STP, IEEE 802.1w Rapid Spanning Tree Protocol (RSTP) for faster convergence, and IEEE 802.1s Multiple Spanning Tree Protocol (MSTP)

BPDU filtering

drops BPDU packets when STP is enabled globally but disabled on a specific port

Jumbo frame support

supports up to 10 kilobyte frame size to improve the performance of large data transfers

VLAN support and tagging

supports IEEE 802.1Q with 4,094 simultaneous VLAN IDs

Layer 3 services

Address Resolution Protocol (ARP)

determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network

DHCP relay

simplifies management of DHCP addresses in networks with multiple subnets

Layer 3 routing

Static IPv4/IPv6 routing

provides basic routing (supporting up to 32 static routes and 8 virtual VLAN interfaces); allows manual routing configuration

Resiliency and high availability

Available redundant power supply

provides additional PoE of up to 795W for high-power applications like PTZ IP cameras, Video IP phones; the HPE RPS1600 Redundant Power System (JG136A), which is sold separately, is for use with the HPE OfficeConnect 1920-24G-PoE+ (180W) switch and HPE OfficeConnect 1920-24G-PoE+ (370W) switch models

Link aggregation

groups together multiple ports up to a maximum of eight ports per trunk either automatically using Link Aggregation Control Protocol (LACP), or manually, to form an ultra-high-bandwidth connection to the network backbone; help prevent traffic bottlenecks. The 8 port models support 4 trunks, 16 and 24 port models support 8 trunks, 48 port models support 16 trunks.

Convergence

• LLDP-MED (Media Endpoint Discovery)

defines a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones

PoE allocations

supports multiple methods (automatic, IEEE 802.3af class, LLDP-MED, or user-specified) to allocate PoE power for more efficient energy savings

Auto voice VLAN

recognizes IP phones and automatically assigns voice traffic to dedicated VLAN for IP phones

Additional information

• Green initiative support

provides support for RoHS and WEEE regulations

Green IT and power

improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes variable-speed fans, reducing energy costs

• Energy Efficient Ethernet

Compliant with IEEE 802.3az standard requirements to save energy during periods of low data activity.

Warranty and support

• Limited Lifetime Warranty

This series comes with a Limited Lifetime Warranty providing advance hardware replacement with next business day shipment in most countries, 24x7 phone support available for the first 90 days, and electronic and business hours phone support for the entire warranty period. See http://www.hpe.com/networking/warrantysummary for full warranty and support information included with your product purchase.

PDU Cable NA/MX/TW/JP

• C15 PDU Jumper Cord (NA/MX/TW/JP)

Build To Order: BTO is a standalone unit with no integration. BTO products ship standalone are not part of a CTO or Rack-Shippable solution.

Switch Enclosure Options

External/Redundant Power Supplies

HPE RPS1600 Redundant Power System

• Height = 1U

• includes 1 x c13, 1600w and Power Supply port

See Configuration NOTE:2, 3, 4

JG136A

HPE RPS1600 1600W AC Power Supply

Installs into JG136A only

JG137A See Configuration NOTE:1, 3

Configuration Rules:

Note 1 If this power supply is selected, The JG136A - HPE RPS1600 Redundant Power System must be on

order or onsite.

Note 2 Localization required.

Note 3 Each switch will only support 1 JG136A and 1 JG137A Power supply systems.

Note 4 This power supply only supported on switch JG926A and JG928A.

External/Redundant Power Cables

HPE X290 1000 A JD5 2m RPS Cable

JD187A
See Configuration
NOTE:1

Remarks: These cables are used to connect the External Power System to Switch.

Configuration Rules:

Note 1 This Cable is only supported on switch JG926A and JG928A when used with the RPS 1600

(JG136A)

HPE OfficeConnect 1920 8G Switch (JG920A)

I/O ports and slots 8 RJ-45 auto-negotiating 10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type

100BASE-TX, IEEE 802.3ab Type 1000BASE-T)

2 SFP 100/1000 Mbps slots (IEEE 802.3u Type 100BASE-FX, IEEE 802.3z Type 1000BASE-X

Supports a maximum of 8 autosensing 10/100/1000 ports plus 2 SFP 100/1000 slots

Additional ports and

slots

1 RJ-45 console port to access limited CLI port

HPE X121 1G SFP LC SX Ports

Transceiver (J4858C) Physical characteristics

A small form-factor pluggable (SFP) Gigabit SX

transceiver that provides a full-duplex Gigabit solution up to 550 m on multimode **Electrical characteristics** Power consumption typical: 0.4 W

Cabling

Environment

Altitude: up to 10,000 ft. (3 km)

Weight: 0.04 lb. (0.02 kg) Transceiver form factor: SFP

Power consumption maximum: 0.7 W

1 LC 1000BASE-SX port; Duplex: full only

Operating temperature: 32°F to 158°F (0°C to 70°C)

Operating relative humidity: 5% to 85%, noncondensing

Type:

62.5/125 µm or 50/125 µm (core/cladding) diameter, gradedindex, low metal content, multimode fiber optic, complying with ITU-T G.651 and ISO/IEC 793-2 Type A1b or A1a, respectively;

Dimensions: 2.24(d) x 0.54(w) x 0.48(h) in. (5.69 x 1.37 x 1.22 cm)

Nonoperating/Storage temperature: -40°F to 203°F (-40°C to 85°C)

Maximum distance:

- 2-220 m (62.5 μ m core diameter, 160 MHz*km bandwidth
- 2-275 m (62.5 μ m core diameter, 200 MHz*km bandwidth
- 2-500 m (50 µm core diameter, 400 MHz*km bandwidth)
- 2-550 m (50 μ m core diameter, 500 MHz*km bandwidth)

Cable length: 2-550m Fiber type: Multi Mode

Cabling

Weight: 0.04 lb. (0.02 kg)

Operating temperature: 32°F to 158°F (0°C to 70°C) Operating relative humidity: 0% to 85%, noncondensing

Nonoperating/Storage temperature: -40°F to 212°F (-40°C to 100°C)

Dimensions: 2.24(d) x 0.54(w) x 0.486(h) in. (5.69 x 1.37 x 1.23 cm)

Altitude: up to 10,000 ft. (3 km)

Type:

Either single mode or multimode; 62.5/125 µm or 50/125 µm (core/cladding) diameter, graded-index, low metal content, multimode fiber optic, complying with ITU-T G.651 and ISO/IEC 793-2 Type A1b or A1a, respectively; Low metal content, single-

Page 22

mode fiber-optic, complying with ITU-T G.652 and ISO/IEC 793-2 Type B1;

Maximum distance:

- 2-550 m (multimode 62.5 μ m core diameter, 500 MHz*km bandwidth)
- 2-550 m (multimode 50 μ m core diameter, 400 MHz*km bandwidth)
- 2-550 m (multimode 50 μ m core diameter, 500 MHz*km bandwidth)
- 2-10,000 m (single-mode fiber)

Notes A mode conditioning patch cord may be needed in some multimode fiber

installations.

Wavelength: 1310nm

Power Consumption: < 500mW Typical

Services Refer to the Hewlett Packard Enterprise website

> at http://www.hpe.com/networking/services for details on the servicelevel descriptions and product numbers. For details about services and response times in your area, please contact your local Hewlett Packard

Enterprise sales office.

HPE X121 1G SFP RJ45 Ports

T Transceiver (J8177C)

HPE X121 1G SFP RJ45 T Transceiver: An SFP format

gigabit transceiver with RJ45 connectors using 1000BaseT technology.

Physical characteristics

Environment

1 RJ-45 1000BASE-T port (IEEE 802.3ab Type 1000BASE-T); Duplex: full

Dimensions: 2.71(d) x 0.54(w) x 0.55(h) in. (6.88 x 1.37 x 1.4 cm) Weight: 0.06 lb. (0.03 kg)

Operating temperature: 32°F to 158°F (0°C to 70°C); with 100 LFM airflow over the SFP module

Operating relative humidity: 0% to 95% @ 75°F (25°C), noncondensing Nonoperating/Storage temperature: -40°F to 185°F (-40°C to 85°C)

Nonoperating/Storage relative humidity: 0% to 95% @ 77°F (25°C),

noncondensing

Altitude: up to 10,000 ft. (3000 km)

Cabling

Cable type:

1000BASE-T: Category 5 (5E or better recommended), 100 Ù differential 4-pair unshielded twisted pair (UTP) or shielded twisted pair (STP) balanced, complying with IEEE 802.3ab 1000BASE-T;

Maximum distance:

100 m

Notes

Power consumption is nominally 1 watt.

For supported platforms and minimum software requirements to support this product, see the document titled "Support for the J8177C 1000Base-T Mini-GBIC" on the "HP Mini-GBICs and SFPs" Manuals Web page. The J8177C Gigabit copper mini-GBIC is not supported on dualpersonality ports.

SX transceiver that

fiber.

provides a full-duplex Gigabit solution up to

550m on a Multimode

A small form-factor

LX transceiver that

on SMF

provides a full duplex Gigabit solution up to

550m on MMF or 10Km

Accessory Product Details

The J8177C is capable of 100 Mb operation. This is supported on only the HP E8200zl, E5400zl, and HP E6200-24G-mGBIC yl Switches using software version K.12.21 or later. Use the "auto-100" port setting to enable 100 Mb operation.

Important: The earlier J8177B does not support 100 Mb operation. When used in the Switch gl 20-Port 10/100/1000 Module (J4908A), the J8177C mini-GBIC can be installed in either the upper or lower mini-GBIC

port, but will block access to the other port.

HPE LC to LC Multi- Cabling mode OM3 2-Fiber 0.5m 1-Pack Fiber Optic Cable (AJ833A)

Cable type:

 $50/125~\mu m$ (core/cladding) diameter, mulitimode fiber optic, with effective modal bandwidth of 2000 MHz/km as detailed in TIA-492AAAC for

distances of up to 300 m

Maximum distance:

10Gbps Transfer Rate (Ethernet): 300m

Notes Cable Specs: Tight buffered duplex fiber optic

Cable Specs: Tight buffered duplex fiber optic multimode OM3 50/125 um fiber optic cable and Ethernet assembly with LC duplex connectors on one and and LC dupley connectors on other and

end and LC duplex connectors on other end.

• Dimensions: Core diameter: 50 ± 3.0um Cladding diameter: 125 ± 2.0um Coating diameter: 245 ± 10um

• Optical glass: Bandwidth: For LED sources: 1500/500 MHz-km @850/1300nm.

 Optical glass: Bandwidth: For Laser sources: 2000/500 MHz-km @850/1300nm. VCSEL Laser sources: 600 / 600 meters @850/1300nm for Gigabit Ethernet compliant links.

140162

- CABLE: The cable is duplex zipcord graded index 50/125um multimode optical fiber and designed to work in both the 850 and 1300 nm wavelength windows.
- BULK CABLE & CABLE ASSEMBLY CONFIGURATION:
- Jacket Material: Riser Grade Low Smoke Zero Halogen thermoplastic.
- Jacket Color: Agua for OM3 multimode per TIA 598
- Boot Color: White
- Insertion Loss: less than 0.5 dB @ 850 with LED source, 0.003 dB/M added for lengths > 30 meters.
- Maximum Cable attenuation: 3.0 dB/km @ 850 nm, 1.0 dB/Km @ 1310 nm @ 23°C as tested in accordance with EIA 455-46.
- Weight: Air Packed Weight: 1 LB Net Weight: 0.454Kg

Services
